BOSNE I HERCEGOVINE

Gospodin Danijel Kobačić

Dragi prijatelji ribolova,

Bosni i Hercegovini pripala je velika čast da Vas, kao domaćini, ugostimo na 21. Svjetskog prvenstva u disciplini „Lov grabljivica umjetnim mamcem s obale - SPIN“, koje će se održati od 15. do 19. svibnja 2024. godine u Kiseljaku, gradu na četiri rijeke od kojih će se na jednoj od njih, Lepenici, održati ovaj značajan događaj.

Iako mala u svijetu ribolova, Bosna i Hercegovina iza sebe ima zavidno iskustvo u organizaciji klupskih, europskih i svjetskih prvenstava kao što su:

- 27. Klupsko prvenstvo u sportskom ribolovu, održano 2007. godine u Čapljini;
- 16. Evropsko prvenstvo u mušičarenju, održano 2010. godine u Banja Luci;
- 15. Svjetsko prvenstvo invalida i 6. Svjetsko prvenstvo veterana, održano u Čapljini;
- 35. Svjetsko prvenstvo u mušičarenju, održano 2015. godine u Jajcu.
- 16. Svjetsko prvenstvo „ Lov ribe umjetnim mamcima s obale - SPIN“, održano 2018. godine u Istočnom Sarajevu.
- 20. Svjetsko prvenstvo za mlade u mušičarenju, održano 2023. godine u Mostaru.

Za sve do sada, uspješno organizovane manifestacije, dobili smo pohvale od najvećih dužnosnika ovoga sporta. Stoga, ne sumnjam da će i ovaj događaj biti na zavidnoj razini, na zadovoljstvo svih sudionika i ljubitelja ribolova.

Želim Vam ugodan boravak u našoj zemlji, gradu Kiseljaku te na lijepim natjecateljskim stazama rijeke Lepenice.

Također, želim da bolje upoznate našu zemlju, gradove, ljude i običaje, te da se vratite svojim domovima ispunjeni pozitivnim dojmovima.

Neka ovo natjecanje bude spoj sportskog duha, povezanosti s prirodom, suradnje među državama sudionicama i sjajnih rezultata.

U to ime pozdravljam Vas našim tradicionalnim pozdravom, BISTRO!

GRAD DOMAĆIN KISELJAK

HOST CITY KISELJAK

Kiseljak se nalazi u srednjoj Bosni, na mjestu gdje se križaju putevi koji povezuju sve njene dijelove.

Prosječna nadmorska visina je 475 m. Teritorij na kojem je naselje razvijeno, dio je Kiseljačke kotline koja se proteže od Paleške Čuprije na jugu, do Gromiljaka na sjeveru, a koju okružuju Jasikovica, Graščica, Berberuša, Zahor i druga brda s nadmorskom visinom od 700 do 1423 m.

Istočno je strateški važno brdo Stogić. Kroz Kiseljak protječe rijeka Lepenica, koja u naselju prima pritoke Kreševčica i Rotiljski potok, te se na sjeveroistočnoj periferiji naselja ulijeva u Fojničku rijeku.

Srednjovjekovnih nalaza je također mnogo, a najbrojniji su stećci. Ima ih na stotine, a samo na području Lepenice postoji 35 nekropola s oko 700 stećaka. Najljepši je stećak Radoja Radosalića u Zabrdju.

Po mišljenju dr. Pavla Anđelića, jednog od najvećih bosanskohercegovačkih arheologa, stećak s Brdanjka jedan je od najljepših u cijeloj BiH.

Kiseljak is located in central Bosnia, at the place where the roads that connect all its parts cross.

The average altitude is 475 m. The territory on which the settlement was developed is part of the Kiseljačka basin, which stretches from Paleška Čuprija in the south to Gromiljak in the north, and is surrounded by Jasikovica, Graščica, Berberuša, Zahor and other hills with an altitude of 700 up to 1423 m.

To the east is the strategically important hill Stogić. The Lepenica river flows through Kiseljak, which receives its tributaries Kreševčica and Rotiljski potok in the settlement, and flows into the Fojnička river on the northeastern outskirts of the settlement.

There are also many medieval finds, and the most numerous are stećci. There are hundreds of them, and only in the area of Lepenica there are 35 necropolises with about 700 stećaks. The most beautiful is the stećak of Radoja Radosalić in Zabrdj.

In the opinion of Dr. Pavle Anđelić, one of the greatest archaeologists in Bosnia and Herzegovina, the stećak from Brdanje is one of the most beautiful in all of Bosnia and Herzegovina.

OPIS TAKMIČARSKIH STAZA

DESCRIPTION OF THE COMPETITION PATHS

Za rijeku Lepenicu možemo sa punim pravom reći da je kiseljačka rijeka, jer mjesto gdje nastaje i ušće gdje se ulijeva u rijeku Fojnicu, sve pripada općini Kiseljak.

U mjestu Sastavci, gdje se sastavljaju Bijela i Crna rijeka, nastaje Lepenica. Za kiseljačane je Lepenica više od rijeke, ona je milenijima svojim tokovima, obrazovala lepenički krajolik, pravila njena polja i činila ih podlim.

Bioraznolikost rijeke je jako razvijena. U rijeci Lepenici žive brojne vrste riba od Potočne pastrve, Lipljena, Mladice, Peša, Mrene, Sapače, Vijuna, Pliske, Klana i Gage. Uz rijeku žive i mnoge druge životinjske vrste, a među njima svakako treba spomenuti i Riječnu Vidru.

Tok rijeke Lepenice je dug 33 km, a protječe kroz kiseljačka naselja Toplica, Zabrdje, Bukovica, Žeželovo, Gojakovac, Kuliješ, Homolj, Boljkovići, Han Ploča, Draževići, Radanovići, Brnjaci, Topole, Potrkaj, Paleška Čuprija i Kiseljak. Nadmorska visina Sasavaka u mjestu njenog nastajanja je 606, a ušće 456mnv. Rijeka dakle protječe kroz visinsku razliku od 150 metara. Na svom putu u iste se ulijevaju mnogi potoci, kao što su Tisovački, Ugljaš, Ivički potok, Zečiji potok, Mutni potok, Rotiljski potok itd. Kada su u pitanju rijeke, u Lepenicu se ulijava samo jedna - rijeka Kreševčića. Istina nekada je Lepenica bila znatno duža jer se u prošlosti Fojnička rijeka ulijevala u Lepenicu koja se svojim tokom ulijevala u rijeku Bosnu u Visokom. Naknadno u novijoj povijesti je to izmjenjeno i rijeka Lepenica je postala pritoka Fojničke rijeke.

We can rightfully say that the Lepenica river is a Kiseljak river, because the place where it originates and the estuary where it flows into the Fojnica river all belong to the municipality of Kiseljak.

In the village Sastavci, where the Bijela and Crna rivers meet, Lepenica is born. Lepenica is more than a river for people from Kiseljak, for millennia, with its streams, it formed the Lepenica landscape, made its fields and made them fertile.

The biodiversity of the river is highly developed. Numerous species of fish live in the Lepenica river, such as Brown trout, Grayling, Huchen, European bullhead, Common barbel, Mediterranean barbel, Spined loach, Spirlin, Common chub and Common minnow. Many other animal species live along the river, and the River Otter should definitely be mentioned among them.

The course of the Lepenica river is 33 km long, and flows through the villages of Toplica, Zabrdje, Bukovica, Žeželovo, Gojakovac, Kuliješ, Homolj, Boljkovići, Han Ploča, Draževići, Radanovići, Brnjaci, Topole, Potrkaj, Paleška Čuprija and Kiseljak. The altitude of Sasavak in the place of its origin is 606, and the mouth is 456m above sea level. The river therefore flows through a height difference of 150 meters. Many streams flow into it on their way, such as Tisovački, Ugljaš, Ivički potok, Zečiji potok, Mutni potok, Rotiljski potok, etc. When it comes to rivers, only one flows into Lepenica - the Kreševčića river. The truth is that Lepenica used to be much longer because in the past the Fojnička river flowed into Lepenica, which in its course flowed into the Bosna river in Visoko. Subsequently, in recent history, this was changed and the Lepenica River became a tributary of the Fojnica River.

ANTI-DOPING INFORMACIJE TUE ZAHTJEVI

Sportisti koji učestvuju na prvenstvu, registracijom implicitno prihvataju sva antidoping pravila WADA-e. Sportista čija bolest ili stanje zahtijeva liječenje zabranjenom supstancom ili metodom mora se prijaviti CIPS-u za Therapeutic Use Exemption (TUE) prateći CIPS-ove striktno procese prijave za TUE.

Takmičar zatim mora koristiti obrazac za prijavu, koji se može preuzeti sa web stranice ITA:

<https://ita.sport/resource/international-testing-agency-therapeutic-use-exemption-tue-application-form/>

Zahtjev za TUE se mora poslati na sljedeću adresu:

tue@ita.sport

Sportisti stoga moraju pogledati Listu zabranjenih proizvoda:

<https://www.wada-ama.org/en/resources/world-anti-doping-code-and-international-standards/prohibited-list>

Ako se TUE odobri, sportisti će tada biti dozvoljeno da koristi lijek tokom perioda važenja TUE bez kršenja antidoping pravila (ADRV). Bez obzira na to da li je TUE odobren ili ne, sportisti bi uvijek trebali na obrascima doping kontrole popunjenim tokom uzimanja uzorka krvi prijaviti sve lijekove i suplemente uzete u roku od sedam dana prije uzimanja uzorka, kao i sve transfuzije krvi u tri mjeseca prije uzimanja uzorka krvi.

Ako je TUE već odobren od strane NADO-a ili RADO-a, dotični sportista ne mora se prijaviti za bilo koji dodatni CIPS TUE, jer CIPS priznaje sve TUE odobrene od strane NADO-a i RADO-a.

FIPSeD ZVANIČNA PRAVILA

FIPSeD pravila su dostupna i mogu se preuzeti na sljedećoj stranici:

https://www.fips-ed.com/reg_fipsed_esche-art-riva_2024_en_def/

ANTI-DOPING INFORMATION TUE REQUESTS

The athletes participating in the Championship, with the registration, implicitly accept all WADA anti-doping rules. Athlete whose illness or condition requires treatment with a prohibited substance or method must apply to CIPS for a Therapeutic Use Exemption (TUE) following the CIPS strict TUE application process.

He/she shall then use the application form, which can be downloaded from the ITA website:

<https://ita.sport/resource/international-testing-agency-therapeutic-use-exemption-tue-application-form/>

The TUE request has to be sent to the following address:

tue@ita.sport

Athletes must therefore consult the Prohibited List:

<https://www.wada-ama.org/en/resources/world-anti-doping-code-and-international-standards/prohibited-list>

If the TUE is granted, the athlete will then be permitted to use the medication during the period of validity of the TUE without committing an Anti-Doping Rules Violation (ADRV). Regardless of whether a TUE has been granted or not, athletes should always declare on the doping control forms filled out during sample collection any medications and supplements taken within the seven days prior to sample collection, and any blood transfusions in the three months prior for blood samples.

If a TUE has already been granted by a NADO or by a RADO, the Athlete in question does not have to apply for any additional CIPS TUE, as CIPS recognizes all TUE granted by NADOs and RADOs.
